Specific entry requirements

For admission to courses on Semester 5, it is required that the student has managed at least 80 % (96 credits) of the courses on semester 1 - 4.

Objectives

The course is included in a streak in professional development which includes total 6 HE credits and runs through all study programme. The general aim with this streak is to give the student knowledge and tool to be able to develop an ethical and professional attitudes by developing both as an individual and in his professional role.

The expected learning outcomes of the course

On completion of the course, the student should be able to:

- Account for national and international research-ethical rules/statements and understand the creation of and the contents of the rules as well as the need of continuing review
- Inform, explain and consult with a patient in decision that concerns her and in research be able to acquire an informed agreement/refusals

- Distinguish fact issues from value questions and ethical problems from basic ethical standards and value conflicts
- Reflect around a professional treatment of patients, researchers, close, colleagues and other concerned on a favourably and respectful way in the handling health care
- Reflect on his own professional development personal development and consultation skill
- Carry out cardiopulmonary.av resuscitation according to current guidelines from Swedish HLR-council.

Content

Professional Development 4, 1.5 hp The course material is presented on the PingPong platform Professional skills, where the different modules are presented. On this web platform the student also collects the written assignments, reflections and other materials to a so called portfolio that comes along through all modules in the streak. The different modules in the streak are given not under some specific week during the semesters but different parts are either integrated in other courses or occur on distance via PingPong parallel with other courses.

Specific contents of Professional skills 4:

In the course Scientific methods 3 research-ethical rules, both national and international, will be discussed. In the courses Hearing rehabilitation 2 and Diagnostics and habilitation of hearing impairments in children, informed agreement with patients and research subjects, professional treatment and ethical problems will be discussed .

Cardiopulmonary.av resuscitation is trained in a compulsory exercise session.

Teaching methods

Seminars, lectures, exercises and own reflections

Examination

Examination takes place through
