Course syllabus for

Specialised Theoretical Studies in Audiology, 7.5 credits

Teoretisk fördjupning inom audiologi, 7.5 hp

This course syllabus is valid from autumn 2014.

Please note that the course syllabus is available in the following versions:

Autumn2012 , Autumn2013 , Autumn2014 , Autumn2016 , Autumn2019 , Autumn2020 , Autumn2022

Course code	1AU042
Course name	Specialised Theoretical Studies in Audiology
Credits	7.5 credits
Form of Education	Higher Education, study regulation 2007
Main field of study	Audiology
Level	G2 - First cycle 2
Grading scale	Pass, Fail
Department	Department of Clinical Science, Intervention and Technology
Decided by	Programnämnd 4
Decision date	2012-05-03
Revised by	Programme Committee 4
Last revision	2014-04-28
Course syllabus valid from	Autumn 2014

Specific entry requirements

For admission to the course, it is required that the student has managed at least 105 HE credits from Semester 1-4. Furthermore, a pass mark is required in the course Hearing rehabilitation 1.

Objectives

The general aim of the course is to provide the student with a deeper theoretical knowledge in audiology.

On completion of the course, the student should be able to:

- demonstrate theoretical knowledge within a specific audiological subject area and relate this to central theorisings within audiology
- independently be able to design a plan to acquire, review critically and synthesise available knowledge and evidence within clinical audiological activities
- present a report and communicate it both orally and in written form.

Content

The elective course in theoretical advanced study will give the student the possibility to specialize within a specific field connected to the clinical handling activities within diagnostics and habilitation/rehabilitation. Examples of advanced study can be tinnitus habilitation, audial pedagogy in clinical activities or advanced study in ABR (Auditory Brainstem Response). The course is carried out independently and contains independent theoretical studies.

Teaching methods

The working methods consist of self-studies. On the unit there will be an authorised audiologist with a Master's degree or the equivalent. The student and supervisors together make up a plan for the implementation of the course. The course is completed with an examination seminar.

Examination

An individually written report which is presented orally at an examination seminar.

For a Pass grade in the course, attendance and active participation in compulsory parts are also required. Students who do not pass a regular examination are entitled to re-sit the examination on five more occasions. Each time the course is offered, one regular examination and two additional examinations are given. Each occasion the student participates in the same test counts as an examination. Supplementary qualification of written assignment is counted as an examination. Submission of a blank exam paper is regarded as an In case a student is registered for an examination but does not attend, this is not regarded as an examination.

Transitional provisions

Examination may take place under the previous reading list during a period of one year after the renewal of the reading list. Examination will be provided during a period of two years after a close-down of the course.

Other directives

An evaluation template containing assessment criteria for examination will be provided. The course evaluation will be carried out according to the guidelines that are established by the Board of education. The course evaluation is carried out both through a written course evaluation at the end of the course and through oral course forum at least once in connection with the course during which the students can state their opinions.

Literature and other teaching aids

Mandatory literature

Scientific articles and other relevant literature for chosen literature study.
