

Course syllabus for

Scientific Methodology 1, 3 credits

Vetenskaplig metodik 1, 3 hp

This course syllabus is valid from autumn 2023.

Please note that the course syllabus is available in the following versions:

[Autumn2016](#) , [Autumn2018](#) , [Autumn2023](#)

| | |
|----------------------------|---|
| Course code | 1BA083 |
| Course name | Scientific Methodology 1 |
| Credits | 3 credits |
| Form of Education | Higher Education, study regulation 2007 |
| Main field of study | Biomedical Laboratory Science |
| Level | G1 - First cycle 1 |
| Grading scale | Fail (U) or pass (G) |
| Department | Department of Laboratory Medicine |
| Decided by | Education committee Labmed |
| Decision date | 2016-05-12 |
| Revised by | Education committee LABMED |
| Last revision | 2023-06-14 |
| Course syllabus valid from | Autumn 2023 |

Specific entry requirements

Biology 2, Physics 1a or Physics 1b1+1b2, Chemistry 2, Mathematics 3b or Mathematics 3c or Mathematics C.

Objectives

The general aim of the course is to place the basis for the scientific approach that dominates the biomedical laboratory science programme. During the time of the education, a continuous development of the student's scientific abilities and attitudes in accordance with the scientific progression ladder of the programme takes place. A specialisation in scientific methodology and statistics takes place during the course scientific methodology 2 in the education.

On completion of the course, the student should be able to:

Knowledge and understanding

- account for and discuss basic scientific concepts
- account at a general level for the basics of scientific methodology
- identify the central stages in the research process

- reflect on the relationship between research and development in biomedical laboratory science

Skill and ability

- formulate a hypothesis based on a given context
- analyse conclusions based on a given context critically
- apply simple statistics
- seek information source-critically
- speak clearly in writing with for the subject area relevant terms

Assessment skill and attitude

- apply a scientific and reflecting attitude in his learning

Content

Scientific theory and method including statistical processing and literature project.

Teaching methods

The course is given in the form of seminars, self-study and lectures.

Examination

Examination takes place in the form of a written examination, written assignments and group-/cross-group presentations. Grade Pass/Fail

A re-examination is given in connection with the course as well as during a re-examination period in August. The students who not are passed after regular examination session have a right to participate at five further examination sessions. In case of absence from compulsory components, an agreement between student and course coordinator concerning supplementary qualification is made.

Transitional provisions

The course will be offered for the last time in the autumn semester of 2023 and will then be cancelled. Examination will be provided until the autumn of 2025 for students who have not completed the course. Information about the examinationdate will be provided on the coursewebb.

Other directives

Course evaluation will be carried out in accordance with the guidelines established by the Board of Higher Education.
