Institutet**

Course syllabus for

# **Nutrition, the nutrients and metabolism, 7.5 credits**

Grundläggande näringsfysiologi, 7.5 hp

This course has been cancelled, for further information see Transitional provisions in the last version of the syllabus.

Please note that the course syllabus is available in the following versions:

Autumn2011 , Spring2012 , Autumn2015 , Autumn2019 , Spring2022 , Spring2024

Course code	1QA096
Course name	Nutrition, the nutrients and metabolism
Credits	7.5 credits
Form of Education	Higher Education, study regulation 2007
Main field of study	Not applicable
Level	First cycle, in-depth level of the course cannot be classified
Grading scale	Pass with distinction, Pass, Fail
Department	Department of Biosciences and Nutrition
Decided by	Styrelsen för utbildning
Decision date	2011-02-10
Revised by	Education committee BioNut
Last revision	2024-02-28
Course syllabus valid from	Spring 2024

## **Objectives**

After completing the course the students should be able to:

- o Describe the physiological function and metabolism of the macronutrients.
- o Explain the energy metabolism and evaluate variations in energy demands due to physical activity level, age and gender as well as physiological and health status.
- o Describe the essential micronutrients; their physiological functions, bioavailability, mechanisms of absorption, metabolism, excretion and storage, food sources and relationship to the maintenance of health.
- o Describe causes and symptoms of malnutrition and define possible causes.
- o Describe the nutrient recommendations, the rationale for them and their application areas.

## **Content**

The key topics are taught in the form of prerecorded lectures followed by study assignments and

mandatory discussion assignments and is examined by a written exam. The topics include introduction to the digestive system, the macro nutrients and the micro nutrients and their metabolism, energy metabolism and nutrient recommendations. This is integrated with discussions about risk groups, symptoms of deficiencies, food sources and supplements.

## Teaching methods

The course includes prerecorded lectures, discussions, study assignments and discussion assignments.

## Examination

The course is examined by a written examination at the end of the course.

Compulsory participation:

Discussion assignments are compulsory. The course director assesses if and, in that case, how absence can be compensated.

Limited number of examinations or practical training sessions:

The student has the right to write the exam six times. The number of times that the student has participated in one and the same examination is regarded as an examination session. Submission of a blank examination is regarded as an examination. An examination for which the student registered but not participated in, will not be counted as an examination.

If there are special reasons, or need for adaptations for a student with a disability, the examiner may decide to depart from the syllabus's regulations on examination form, number of examination opportunities, possibility of complementation of or exemption from compulsory activities, etc. Content and learning outcomes as well as the level of expected skills, knowledge and abilities must not be altered, removed or lowered.

## Transitional provisions

The course has been cancelled and was offered for the last time in the spring semester of 2024. The course has been replaced with another, and examination will be provided according to the guidelines in the syllabus for 1QA145.

## Other directives

Language of instruction: swedish.
