Course syllabus for

Nutrition, the nutrients and metabolism, 7.5 credits

Grundläggande näringsfysiologi, 7.5 hp

This course has been cancelled, for further information see Transitional provisions in the last version of the syllabus.

Please note that the course syllabus is available in the following versions:

Autumn2011 , Spring2012 , Autumn2015 , Autumn2019 , Spring2022 , Spring2024

Course code	1QA096
Course name	Nutrition, the nutrients and metabolism
Credits	7.5 credits
Form of Education	Higher Education, study regulation 2007
Main field of study	Not applicable
Level	First cycle, in-depth level of the course cannot be classified
Grading scale	Pass with distinction, Pass, Fail
Department	Department of Biosciences and Nutrition
Decided by	Styrelsen för utbildning
Decision date	2011-02-10
Revised by	Education committee BioNut
Last revision	2018-11-12
Course syllabus valid from	Autumn 2019

Objectives

After completing the course the students should be able to: o Describe the physiological function and metabolism of the macronutrients. o Explain the energy metabolism and evaluate variations in energy demands due to physical activity level, age and gender as well as physiological and health status. o Describe the essential micronutrients; their physiological functions, bioavailability, mechanisms of absorption, metabolism, excretion and storage, food sources and relationship to the maintenance of health. o Describe causes and symptoms of malnutrition and define possible causes. o Describe the nutrient recommendations, the rationale for them and their application areas.

Content

The key topics are taught in lectures followed by seminars and examined by a written exam. The topics include; introduction to the digestive system, the macro nutrients and the micro nutrients and their

metabolism, energy metabolism and nutrient recommendations. This is integrated with discussions about risk groups, symptoms of deficiencies, food sources and supplements. An in-depth individual work regarding common nutrient deficiencies is performed during the course.

Teaching methods

The course includes lectures, discussions, an individual assignment and student presentations.

Examination

The course is examined by a written examination at the end of the course. Compulsory participation: Seminars and presentations are compulsory. The course director assesses if and, in that case, how absence can be compensated. Limited number of examinations or practical training sessions: The student has the right to write the exam six times. The number of times that the student has participated in one and the same examination is regarded as an examination session. Submission of a blank examination is regarded as an examination. An examination for which the student registered but not participated in, will not be counted as an examination.
