

Course syllabus for

Radiology 2, 7.5 credits

Röntgendiagnostik 2, 7.5 hp

This course syllabus is valid from autumn 2023.

Please note that the course syllabus is available in the following versions:

<u>Autumn2007</u>, <u>Autumn2008</u>, <u>Autumn2009</u>, <u>Autumn2010</u>, <u>Autumn2011</u>, <u>Autumn2012</u>, <u>Spring2016</u>, <u>Autumn2016</u>, <u>Autumn2017</u>, <u>Autumn2018</u>, <u>Autumn2019</u>, <u>Autumn2021</u>, Autumn2023, <u>Autumn2024</u>

Course code 1RS006
Course name Radiology 2
Credits 7.5 credits

Form of Education Higher Education, study regulation 2007

Main field of study Radiography
Level G2 - First cycle 2

Grading scale Pass with distinction, Pass, Fail

Department Department of Clinical Science, Intervention and Technology

Decided by Programnämnden för röntgensjuksköterskprogrammet

Decision date 2007-06-20

Revised by Education committee CLINTEC

Last revision 2023-03-13 Course syllabus valid from Autumn 2023

Specific entry requirements

To be qualified to a higher semester, it is required that the student has taken at least 15 credits from last semester, and all credits from previous semesters.

Objectives

On completion of the course, the student should be able to:

- identify and explain pathological changes with medical terminology within diagnostic imaging of the skeleton system
- identify and explain commonly occurring pathological changes using medical terminology within various modalities and examination methods for the thoracic, abdominal and urogenital organs
- describe how contrast agents can contribute to the diagnosis in radiological imaging studies
- account for current research relevant to image radiological diagnostics and discuss its clinical application
- analyse and assess diagnostic radiographic images concerning image quality

Course code: 1RS006

Content

The course examines commonly used pathology in children and adults that can be made visible with image diagnostic methods. By means of image studies, the student is trained to identify disease states that require emergency measures in imaging radiological material imagery. A central part is being able to explain pathological changes and their location with adequate medical terminology, relationship between referral content and pathological changes on image diagnostic material. Within orthopedics, different types of osteosynthetic material are also studied to identify these.

The course also discusses image quality related to enabling the visualization of pathological conditions and how different examination methods can be justified on the basis of a scientific basis and an evidence-based working method.

Teaching methods

Lectures, workshops and project.

Examination

The learning outcomes are examined through individual written exam. In order to be approved for the course, an approved implementation of mandatory elements is also required.

In consultation with the examiner of the course, the student may get a complementary assignment in case of absence from a compulsory part.

The student is entitled to a total of six test occasions to get passed.

In connection to the course three occasions will be given One within the course, two during the following re-examinations. In certain cases, it is required that the student submits an exemption application before he/she get the results of his/her latest completed examination. Three more opportunities will be provided as described above when the course is run next time.

If the course is examined by a extern exam, or other assignments with deadlines, a latest submission date is given at the introduction of the course. In cases where a completion is required a new date for latest submission is set. If the requirements for submission are not fulfilled the student is given the opportunity to submit the exam or the assignment at the next time course is given. Reasons for not meeting deadlines may be taken under consideration by examiner.

The examiner decides whether, and if so, how absence from compulsory educational elements can be taken again. Study results cannot be reported until the student has participated in compulsory course elements or compensated for any absence in accordance with instructions from the examiner. Absence from a compulsory course element could mean that the student can not retake the element until the next time the course is offered.

If there are special grounds, or a need for adaptation for a student with a disability, the examiner may decide to deviate from the syllabus's regulations on the examination form, the number of examination opportunities, the possibility of supplementation or exemptions from the compulsory section/s of the course etc. Content and learning outcomes as well as the level of expected skills, knowledge and abilities may not be changed, removed or reduced.

Transitional provisions

The student has the opportunity to be examined under a previous course syllabus within a year after the date of the course was decided closed-down or undergoes major changes.

Course code: 1RS006

Other directives

Course evaluation will be carried out in accordance with the guidelines established by the Committee for Higher Education.
