- The nursing process.
- Vaccination activity.
- Medical technology and safety.
- Ethical aspects.
- Multifaceted perspective in complex situations.
- Quality development and evidence-based methods.

Teaching methods

The course is carried out both as campus education (full-time) and as distance education (which is half-speed) and is web-based. The teaching start from a problem-oriented and collaborative view on

learning the working methods where give precondition because the student takes responsibility actively for their learning.

The working methods that are used are individual study assignments, work in groups, virtual discussions and seminars and lectures. The number physical meetings for the distance course are limited to at most 2 days/7.5 credits.

The examiner decides whether, and if so how, absence from compulsory course elements can be made up. Study results cannot be reported until the student has participated in compulsory course elements or compensated for any absence in accordance with instructions from the examiner. Absence from a compulsory course element could mean that the student can not retake the element until the next time the course is offered.

Clinical placement is included in the course and during this period, supervision and reflection are included individually and/or in groups.

Examination

Part 1 - Health and living conditions for children and youths

Individual and written examination and/or web-based home examination. The examination is based on a complex fictitious case within the activities for child health and the medical actions of the pupil health.

Students who do not pass a regular examination are entitled to re-sit the examination on five occasions more. If the student has failed a total of six examinations/tests, no additional examination is given. Each occasion the student participates in the same test counts as an examination. Submission of a blank exam paper is regarded as an examination. In case a student is registered for an examination but does not attend, this is not regarded as an examination.

Late submissions of examinations are not accepted. Students who have not submitted on time are referred to re-examination. An electronic examination that has been opened via the learning management system counts as an examination session even if the examination is not submitted.

Part 2 - Placement within child health and the medical actions of the pupil health

Clinical examination within child health and the medical actions of the pupil health. The examination is based on independent implemented health care and nursing, that is presented in writing and being analysed with support of current scientific literature.

The placement that is included in the course is compulsory (32 h/1.5 credits), approximately 3 credits child health and approximately 3 credits the medical actions of the pupil health. Under the placement, continuous discussion of the students' achievements takes place. Failed clinical training may be reviewed once more.

Examiner can with immediate impact interrupt a student's clinical training or the equivalent if the student shows such serious deficiencies in knowledge, skills or attitudes that the patient security or the patients' trust for the healthcare are jeopardized. When placement is interrupted such as this, it implies that the student fails on current part and that one clinical training occasion is consumed. In such cases, an individual action plan should be established, where it appears which activities and examinations that are required before the student is given possibility to a new clinical training placement on this course. Failed placement in clinical training may only be carried out once more.

If there are special grounds, or a need for adaptation for a student with a disability, the examiner may decide to deviate from the syllabus's regulations on the examination form, the number of examination opportunities, the possibility of supplementation or exemptions from the compulsory section/s of the course etc. Content and learning outcomes as well as the level of expected skills, knowledge and abilities may not be changed, removed or reduced.

Transitional provisions

If a student has not accomplished a course, the student has possibility to be examined according to then current course syllabus and course literature list up to one year after change or change of course syllabus

and course literature list.

Other directives

Course evaluation takes place in accordance with the guidelines established by the Board of Education.

The course will not be credited in a degree together with another course the student has completed and passed which completely or partly corresponds to the contents of this course.
