Course code	2EE027
Course name	Clinical rotation psychiatry 1
Credits	6 credits
Form of Education	Higher Education, study regulation 2007
Main field of study	Medicine
Level	AV - Second cycle
Grading scale	Excellent, Very good, Good, Satisfactory, Sufficient, Fail, Fail
Department	Department of Clinical Neuroscience
Decided by	Programnämnden för läkarprogrammet
Decision date	2008-01-17
Revised by	Programnämnden för läkarprogrammet
Last revision	2008-02-07
Course syllabus valid from	Spring 2008

Specific entry requirements

General requirements - A very good command of English, corresponding to 550 TOEFL scores, or a very good command of Swedish, corresponding to a pass in the TISUS-test - Three years of study at a study programme in Medicine - Ability to take medical history and to perform a physical examination of a patient - Basic computer knowledge
Specific requirements - Passed medical schools basic course in internal medicine or equivalent - Basic knowledge of common psychiatric disorders

Objectives

After the course, students are expected to: show a more profound knowledge in diagnostic skills and management of patients affected with common psychiatric disorders. reflect on important questions such as attitudes, ethics, gender and ethnicity in relation to psychiatry. reach a progression in knowledge and understanding of psychiatric disorders regarding its very many different facets with a starting point in each individual students level of knowledge. The course is suitable for students planning a career as a clinician, irrespective of discipline.

Content

The clinical rotation can include auscultation in various units i.e. in-patient wards, general psychiatric out-patient clinics as well as specialised units for affective disorders, psychotic disorders and eating disorders etc. An individualised schedule is set up by a responsible supervisor with regard to the students individual qualifications and interests. Emphasis will be put on the students training in psychiatry history taking and mental state examination. Time is given for studies of literature and Internet searches

Teaching methods

Mostly clinical work and auscultation at different clinics. The extent of participation in patient care is determined by the students experience and ability. The student is required to study relevant literature and to write logbook. The rotation includes personal supervision delivered by a physician at the unit. When arriving at the psychiatric department at Karolinska University Hospital - Huddinge or Solna - or at the psychiatric department at St Görans hospital, the student will get a detailed schedule. Any absence must be reported to the supervisor, who also makes a decision about how the student should compensate for the absence.

Examination

A logbook should be written by the student and has to be reported to the supervisor. The logbook should include relevant information about the patients encountered each day. One of the patients should be explored and presented more in detail. The logbook data has to be presented no less than five days before the end of the rotation. should compensate for the absence.

Literature and other teaching aids

There is no literature specified for this course. Please contact the department for more information.
