[Autumn2010](#) , [Spring2014](#) , [Spring2015](#) , [Spring2018](#) , [Spring2020](#) , [Spring2021](#) , [Spring2023](#) , [Spring2024](#)

Course code	2LG021
Course name	Degree project in speech and language pathology
Credits	30 credits
Form of Education	Higher Education, study regulation 2007
Main field of study	Speech and Language Pathology
Level	AV - Second cycle
Grading scale	Pass, Fail
Department	Department of Clinical Science, Intervention and Technology
Decided by	Programnämnd 4
Decision date	2010-05-05
Revised by	Programme Committee 4
Last revision	2013-11-04
Course syllabus valid from	Spring 2014

Specific entry requirements

For admission to Degree project in speech and language pathology, the student must have a Pass grade in all previous courses, semester 1-6, and may only may remain a maximum of 7.5 credits from semester 7.

Objectives

On completion of the course, the student is expected to be able to *Knowledge and understanding*

- independently identify and formulate research questions, plan, implement, compile, draw conclusions and present results of a research study orally and in writing in the form of a thesis or a scientific manuscript within given time frames
- independently integrate knowledge and analyze, assess and handle complex phenomena, issues and situations even with limited information
- show more indepth knowledge and understanding of speech and language pathology, comprising

an overview of the field and deeper knowledge within certain areas

- demonstrate an understanding of current research and development work and knowledge of the relationship between science and proven experience and its importance for the professional practice.
- be able to describe at a general level different research methods in theoretical and clinical speech and language pathology research and related research in linguistics and psychology

Skill and ability

- show advanced ability to critically review, evaluate and use relevant information and discuss new facts, phenomena and issues with different groups and thereby contribute the development of the profession and professional activities
- give constructive criticism of the thesis of a fellow student as opponent at a seminar
- show the skills required to participate in research and development work

Judgement ability and approach

- consider the ethical aspects of research and development work
- identify his/her own need of additional knowledge and continuous skill development

Content

The student will under supervision carry out a descriptive or experimental study including all parts of the research process: literature search, project plan, research questions, data collection, data processing, interpretation and presentation. The study can be carried out and the thesis written individually or with a fellow student. The work should be carried out independently and quantity and quality should correspond to a publishable article in a scientific journal within the speech and language pathology field. After an introductory seminar in semester 6, a seminar series is completed in semester 7 with literature search, statistics and science theory. During the seminar series, a project plan should be completed, presented and reviewed by a fellow student. The planned study is then carried out.

Teaching methods

The course comprises, all in all, 20 weeks of full-time work, the main part of which is devoted to the independent project work under supervision. The preparation of seminars and final seminars for presentation and opposition are included.

Examination

The examination includes reporting in writing and oral presentation of the project plan, reporting in writing and oral presentation as well as defence of the thesis, and opposition of the work of other fellow student. In order to pass, these parts should be carried out and a corrected version of the thesis be submitted. The examiner assesses the thesis.

The seminars are compulsory.

For students who have not passed the regular examination, a re-examination at a later date is offered, as agreed with the supervisor and the examiner. Students who do not pass a regular examination are entitled to re-sit the examination on five more occasions. If the student has carried out six failed tests, no further examination opportunity is given. Each occasion the student participates in the same test counts as an examination.

Transitional provisions

Examination can take place according to an earlier literature list during a period of one year after the date when a renewal of the literature list was made. Examination will be provided during a time of two years after a possible discontinuation of the course.

Other directives

The course evaluation will be carried out in accordance with the guidelines established by the Board of Education.
