

Course syllabus for

## **Basic biology, 7.5 credits**

Grundläggande biologi, 7.5 hp

This course has been cancelled, for further information see Transitional provisions in the last version of the syllabus.

Please note that the course syllabus is available in the following versions:

[Autumn2007](#) , [Autumn2008](#) , [Autumn2009](#) , [Autumn2010](#) , [Autumn2011](#) , [Autumn2012](#) , [Autumn2013](#) , [Autumn2014](#) , [Autumn2018](#) , [Autumn2019](#) , [Autumn2020](#) , [Autumn2021](#)

Course code	2PS002
Course name	Basic biology
Credits	7.5 credits
Form of Education	Higher Education, study regulation 2007
Main field of study	Not applicable
Level	GX - First cycle
Grading scale	Pass with distinction, Pass, Fail
Department	Department of Clinical Neuroscience
Participating institutions	<ul style="list-style-type: none"><li>• Department of Neuroscience</li></ul>
Decided by	Programnämnden för Psykologprogrammet
Decision date	2007-06-21
Revised by	Education committee CNS
Last revision	2018-02-28
Course syllabus valid from	Autumn 2018

## **Specific entry requirements**

Ma B, Sh A with at least the Pass grade/3.

## **Objectives**

### *Part 1*

On completion of this part, the student should be able to:

1. describe at a general level how studies of evolution and behaviour of animals can contribute to the knowledge of human psychology
2. describe at a general level human evolutionary history
3. describe at a general level the mechanisms of biological evolution (mutation and selection) and its results (adaptation)
4. describe at a general level the concept of behaviour and be able to explain relationships between

inheritance, environment and an individual's behaviour

5. describe at a general level the following concepts: cultural evolution, evolutionary psychology, behavioural ecology, and be able to list different opinions about the importance of our evolutionary history

### *Part 2*

On completion of this part, the student should be able to:

1. describe the structure and function of the nervous system
2. describe the structure and function of the neuron
3. describe the structure and function of certain organ systems

## **Content**

The course consists of two parts.

### **Evolution and ethology, 2.5 hp**

Grading scale: GU

Part 1 includes evolution ethology and animal psychology and how this can contribute to knowledge about human psychology.

### **Neurobiology and physiology, 5.0 hp**

Grading scale: VU

In objective 1, the structure and the functional division of the nervous system, and name and function of important neuroanatomical structures, are included.

In objective 2, the specific structure of the neuron, description of the action potential and neurotransmission are included.

In objective 3, the heart and circulation, the gastrointestinal tract, the liver, the kidneys and the urinary tract, the respiratory system, endocrinology and the immune system are included.

## **Teaching methods**

### Part 1

Teaching consists of lectures that are followed up by seminars where contents from lectures are discussed.

### Part 2

The main part of the teaching takes place in the form of lectures where the students are encouraged to take active participation. Included is a workshop in neuroanatomy where the students participate in demonstration of human brain tissue and a laboratory session where the students will dissect a lamb's heart and inspect a human corpse. To the lectures, the students will obtain study questions that they can work independently with. There is also scheduled time when the students can discuss these questions with each another and with teachers.

## **Examination**

### Part 1:

- 1) Written examination

At the examination one of the grades Pass (G) or Fail (U) is given.

### Part 2:

- 1) Two oral tests
- 2) Written examination

The oral tests are graded Passed/Failed. At the written examination one of the grades Pass with distinction, Pass, or Failed is given. For the grade Pass with distinction on part 2 Pass with distinction in the written examination and Pass in both oral tests are required. To pass part 2 Pass in the examination and Pass in the two oral tests are required.

For Pass with distinction of the whole course, Pass in part 1 and Pass with distinction in part 2 are required. For the grade Pass in the whole course, at least Pass in both parts are required.

Students who do not pass the regular examination are entitled to retake the examination on five more occasions. If the student has carried out six failed examinations/tests no additional examinations will be given. As examination trials, the occasion when the student has participated in the same test are counted. Submission of blank exam is counted as an examination trial. Examination to which the student registered but not participated in, will not be counted as an examination trial.

## Transitional provisions

The transition rules follow KI's local guidelines for examination.

## Other directives

Course evaluation takes place according to KI's local guidelines. Results and other measures are returned to the students on the course web.

## Literature and other teaching aids

### Mandatory literature part 1

The literature of part 1 consists of articles that will be provided before the course starts.

### Mandatory literature part 2

The student will choose one of the following three books of physiology: Mader's Understanding Human Anatomy and Physiology, Fysiologi eller Människokroppen: Fysiologi och anatomi.

Note that Fundamentals of Human Neuropsychology is mandatory for everyone.

*Kolb, B.; Whishaw, I. Q.*

#### **Fundamentals of human neuropsychology**

6th edition : New York : Worth Publishers, 2008

#### **Maders Understanding Human Anatomy & Phy.**

Gardners Books, 2010. - p.
