Teaching methods

The course includes lectures, laboratory sessions and demonstrations and independent written examination tasks.

The course also contains field studies (in part 1 and 2) that be planned in consultation with responsible teacher. Laboratory sessions, demonstrations and field studies are compulsory parts. In consultation with the examiner of the course, the student can receive complementary assignment in case of absence from compulsory parts.

Examination

Part 1 is examined through independent written examination and participation in workshops.

Part 2 is examined through independent written examination, the exam is in two parts, one in the fall semester and one in the spring semester. Both exams must be passed to be approved for the course. Study assignments and VIL must also be completed in order to be approved for the course.

Part 3 is examined through written compilation and oral presentation.

For a Pass grade in the course is required participation in workshops, VIL, study assignments, seminars and individual assignment and passed independent written examination.

A student who has failed in the regular examination, is entitled to participate in five more examinations. If the student has failed six examinations/tests, no more examination is offered. The number of times that the student has participated in one and the same examination is regarded as an examination session. Submission of a blank examination is regarded as an examination. An examination for which the student registered but not participated in, will not be regarded as an examination.

Transitional provisions

Examination will be provided during a period of two years after a close-down of the course.

Examination may take place under a previous reading list during a period of one year after the date of the renewal of the reading list.

Other directives

Course evaluation will be carried out in accordance with the guidelines established by the Board of Education at Karolinska Institutet.

Language of instruction: Swedish.
