

Course syllabus for

Medical Acupuncture, 15 credits

Medicinsk akupunktur, 15 hp

This course syllabus is valid from autumn 2024.

Please note that the course syllabus is available in the following versions:

[Autumn2019](#) , [Autumn2020](#) , [Autumn2021](#) , [Autumn2022](#) , [Autumn2024](#)

Course code	2QA286
Course name	Medical Acupuncture
Credits	15 credits
Form of Education	Higher Education, study regulation 2007
Main field of study	Not applicable
Level	Second cycle, in-depth level of the course cannot be classified
Grading scale	Pass, Fail
Department	Department of Neurobiology, Care Sciences and Society
Decided by	Utbildningsnämnden NVS
Decision date	2018-12-12
Revised by	Education committee NVS
Last revision	2024-03-08
Course syllabus valid from	Autumn 2024

Specific entry requirements

A minimum of 120 credits and a licence to practise issued by Socialstyrelsen as a occupational therapist, physiotherapist, doctor of medicine, nurse, or dentist. Or a licence to practise issued by Socialstyrelsen as a naprapath or chiropractor. And proficiency in Swedish and English equivalent to Swedish B/Swedish 3 and English A/English 6.

Objectives

The course in medical acupuncture aims at achieving skills in integrating medical acupuncture as a treatment method for patients with pain in clinical practice.

Knowledge and understanding

On completion of the course, the student should be able to:

- explain origin and modulation of pain from a physiological perspective
- describe how medical acupuncture modulates the nervous system and influences physiological processes
- describe, explain and motivate dosage, indications and contraindications, risks, legal aspects and

- keeping medical records as well as
- critically describe and review treatment principles from a physiological perspective

Skills and abilities

On completion of the course, the student should be able to:

- classify a given pain condition and explain the choice based on knowledge in pain physiology and known clinical findings and be able to apply principles of pain measurement and pain rating
- independently plan, carry out and evaluate treatment with manual acupuncture/electroacupuncture in patients with different pain conditions

Judgement and approach

On completion of the course, the student should be able to:

- reflect on patients individual variations that can influence the pain experience, the planning and the implementation of the acupuncture treatment such as the effect of sex, age, physiological and psychological factors
- reflect and evaluate design and performance analysis in scientific articles in the area of acupuncture

Content

The course is divided into four parts.

Pain physiology, 3.0 hp

Grading scale: GU

Part 1 contains:

Pain physiology, pain classification, endogenous pain modulating systems, placebo and nocebo as well as pain analysis and pain rating.

Safety, legal aspects and hygiene, 1.0 hp

Grading scale: GU

Part 2:

Safety, legal aspects and hygiene.

Medical acupuncture; physiology and treatment principles, 6.0 hp

Grading scale: GU

Part 3:

Acupuncture physiology, treatment principles, dosage, sham- and placebo acupuncture and electroacupuncture.

Medical acupuncture; practice, 5.0 hp

Grading scale: GU

Part 4:

Practical application (needling) with localisation of needle points and practical training as well as patient case seminars.

Teaching methods

All in the course included parts start from a problem-oriented and collaborative view on learning where the working methods give precondition because the student takes responsibility for his learning actively. Central is to take responsibility for the learning and to search and evaluate new knowledge.

The course contains lectures, web-based lectures, webquiz, seminars, workshops, clinical reasoning, written assignments and practical application. In addition, self studies.

Practical application (needling practise) takes place in pairs (or in groups of three students) during the entire course why you as a participant need to feel comfortable being needled during the course. All students will needle and be needled on those acupuncture points taught during the course. For security reasons, the compulsory sessions of acupuncture treatment has to be attended before the students are allowed to begin the practical application (needling).

Examination

Part 1. Pain physiology

Is examined in a written digital exam.

Part 2. Safety, legal aspects and hygien

Is examined in a written digital exam.

Part 3. Medical acupuncture; physiology and treatment principles

Is examined via oral and written assignments alone or in a group at seminars and workshops, through submissions* as well as through an individual oral digital exam.

Part . Medical acupuncture; practice

Is examined using practical exercises and oral assignments at the seminars*.

* Compulsory parts in the course are seminars/workshops and practical applied parts which are marked in the timetable. Attendance at other parts of the course are not compulsory, but are strongly recommended. Attendance during the initial mandatory sessions is required for safety reasons for continued participation in the course. Possibility to supplement certain absence from compulsory parts can be offered at assembly time. On absences more than a day, there will be an opportunity at the next course, provided that there is a decided course.

The examiner assesses if and, in that case, how absence can be compensated. Before the student has participated in all compulsory parts or compensated absence in accordance with the course coordinator's instructions, the student's results for respective part will not be registered in LADOK. Compensation for absence from compulsory parts might not be able to be implemented until the next course date.

Students who have not passed the regular examination are entitled to participate in five examinations. If the student has failed six examinations, no additional examination will be offered. Every time the student participates in the same test counts as an examination session. Submission of blank exam is counted as examination session. Examination for which the student registered but not participated in does not count as an examination.

If the student fails at a practical moment the student is entitled to one more examination session.

If there are special grounds, or a need for adaptation for a student with a disability, the examiner may decide to deviate from the syllabus's regulations on the examination form, the number of examination opportunities, the possibility of supplementation or exemptions from the compulsory section/s of the course etc. Content and learning outcomes as well as the level of expected skills, knowledge and abilities may not be changed, removed or reduced

Transitional provisions

The course will be given for the last time during the fall semester 2024. Examination will be offered

during the spring semester of 2025 for students who have not completed the course with a passing grade. The course will then be cancelled.

Other directives

Language of instruction: Swedish.

Course evaluation takes place in accordance with the guidelines established by the Board of Education.
