Objectives

After completion of the course, the student should be able to: - Analyze health care systems in low and middle income countries (LMIC). - Understand health planning processes in LMIC including human resource planning. - Describe and explain management and leadership models in health care and be able to use them analytically. - Use some basic concepts and tools in health economics. - Describe basic health care financing models and use them in analysis. - Describe the Swedish health care system and relate it to general issues around health care systems.

Content

- Introduction to management, planning and leadership. - Policy-making, planning and capacity building in LMIC. - Leadership and governance . - Change management and practical applications in LMIC. - Health care financing. - Basic principles of health economics. - Presentation and application of cost-effectiveness analysis. - Presentation of basic issues and methods for monitoring and evaluation.

Teaching methods

Teaching will be in the form of interactive lectures and group assignments.

Examination

- Individual assignment. - Written report and oral presentation of group work. - Participation in lectures and group work is mandatory and absence will result in additional tasks that have to be fulfilled if it is assessed that the level of attendance is negatively influencing a student to achieve the learning outcomes. Written examination and individual contributions in group work. - The students who do not pass the examination on the first occasion are offered a maximum of five additional opportunities to sit the examination.

Transitional provisions

Students who previously attended the course may sit for the examination up to two years after the last course has been held.

Other directives

The course will be evaluated in accordance with the guidelines established by the board of Education.
