Course syllabus for

Infectious diseases-a challenge to global health: clinical, social and preventive aspects, 4.5 credits

Infektionssjukdomar-en utmaning för global hälsa: kliniska, sociala och förebyggande aspekter, 4.5 hp
This course syllabus is valid from autumn 2017.

Please note that the course syllabus is available in the following versions:

[Autumn2009](#) , [Autumn2012](#) , [Autumn2015](#) , [Autumn2017](#) , [Autumn2018](#) , [Autumn2020](#) , [Autumn2021](#) ,
[Autumn2022](#) , [Autumn2023](#)

Course code	3GB016
Course name	Infectious diseases-a challenge to global health: clinical, social and preventive aspects
Credits	4.5 credits
Form of Education	Higher Education, study regulation 2007
Main field of study	Global Health
Level	AV - Second cycle
Grading scale	Fail (U), pass (G) or pass with distinction (VG)
Department	Department of Global Public Health
Decided by	Programnämnden för folkhälsovetenskap
Decision date	2009-05-15
Revised by	Education committee PHS
Last revision	2017-03-22
Course syllabus valid from	Autumn 2017

Specific entry requirements

Bachelor's degree or vocational degree worth at least 180 higher education credits. Proficiency in the English language documented by an internationally recognized test such as TOEFL with a total score of at least 79 (internet based), 550 (paper based), 213 (computer based), IELTS with a total score of at least 6,0 (no band less than 5,0), or other documentation that certifies English language skills equivalent to English B/English 6 at Swedish upper secondary school.

Objectives

After completion of the course the student should be able to:

- Understand and describe important communicable diseases from a global health perspective, including pathogenesis, treatment aspects, prevention, disease control mechanisms and research needs.
- Have knowledge on global epidemiology of the most important infectious diseases and to understand and discuss prevention aspects from a social, medical, ethical and health

systems perspective.

- Analyse factors affecting the use of anti-microbial drugs, both on macro and micro level, and analyse impacts of drug resistance on global health.

Content

- The course covers broad aspects - from cell to society - of the most important infectious diseases from a global perspective, including epidemiology, pathogenesis, clinical aspects, diagnostic methods, therapeutic management, drug resistance, prevention as well as the social context and health systems aspects.
- The following diseases will be given special emphasis: malaria, respiratory infections, gastrointestinal infections, HIV, tuberculosis and infections that primarily affect children under five. The specific characteristics of each of these diseases will be highlighted and discussed.
- Parasitic illnesses and neglected tropical infections as well as current epidemics such as Ebola and Zika will also be discussed from a medical and social perspective
- The global impact of resistance to various types of anti-microbial drugs will be particularly recognised and factors affecting drug use, both on macro and micro level, will be discussed and analysed.
- Research needs to reduce the burden of infectious diseases from a global perspective will be illuminated.

Teaching methods

The course will consist of lectures, seminars and group work and resulting in a poster and an oral presentation.

Examination

Written examination.

Limitation of number of occasions to write the exam

The student has the right to write the exam six times. If the student has not passed the exam after four participations he/she is encouraged to visit the study advisor.

The number of times that the student has participated in one and the same examination is regarded as an examination session. Submission of a blank examination is regarded as an examination. An examination for which the student registered but not participated in will not be counted as an examination.

Transitional provisions

Examination will be provided during a time of two years after a possible cancellation of the course.

Examination can take place according to an earlier literature list during a time of one year after the date when a major renewal of the literature list has been made.

Other directives

The course will be evaluated in accordance with the guidelines established by the Board of Higher Education.

The course language is English.
