

Course syllabus for

Junior Research Project, 9 credits

Junior Research Project, 9 hp

This course has been cancelled, for further information see Transitional provisions in the last version of the syllabus.

Please note that the course syllabus is available in the following versions:

[Spring2012](#) , [Spring2014](#) , [Spring2016](#) , [Spring2020](#)

Course code	4BI088
Course name	Junior Research Project
Credits	9 credits
Form of Education	Higher Education, study regulation 2007
Main field of study	Biomedicine
Level	AV - Second cycle
Grading scale	Pass with distinction, Pass, Fail
Department	Department of Medical Biochemistry and Biophysics
Decided by	Programnämnd 7
Decision date	2011-12-21
Revised by	Programme Committee 7
Last revision	2015-11-09
Course syllabus valid from	Spring 2016

Specific entry requirements

A Bachelor's degree or a professional degree worth at least 180 credits in biomedicine, biotechnology, cellular and molecular biology or medicine. English language skills equivalent to English B at Swedish upper secondary school.

Objectives

The aim of the course is to broaden and deepen the student's methodological knowledge within the field of biomedical research in the context of a scientific project.

Upon completion of the course, the student should be able to:

Regarding knowledge and understanding

- account for a biomedical experimental method and the theory behind it,
- explain the choice of method,
- apply experimental methods to answer a scientific question.

Regarding competence and skills

- carry out an experimental method within biomedicine in a safe, technically correct and skillful manner,
- interpret results in relation to the choice of method in the context of a scientific project,
- account for and analyse their own laboratory work by writing a scientific report according to scientific ethical rules for publication of results,
- discuss scientific methods and results within a group of peers.

Regarding judgement and approach

- demonstrate realistic time planning, capability to work in a group and the ability to connect theoretical and practical expertise.

Content

The course consists of an individual research project with an emphasis on methodology and literature studies according to an individual study plan that also serves as a project description. The individual study plan is established by the supervisor and student together before the course. At the end of the practical work, a research report is written that is to be presented orally and discussed.

Projects can be carried out at another university or public authority than Karolinska Institutet, or at a company.

Teaching methods

Individual laboratory work and scientific writing under supervision. Participation in seminars, journal clubs or similar activities within respective scientific environments. Gathering of scientific literature according to the supervisor's recommendation and own assessment.

Examination

Passing of the course requires approved research project and presentations (written and oral) and active participation in discussion of the oral presentations. The examiner sets the grade after consultation with the supervisor and the examining teacher based on the work performance, the research report and the research presentation.

Compulsory participation

Attendance is compulsory for the research work and the oral presentation. The course director together with the supervisor assesses if and, in that case, how absence can be compensated. Before the student has participated in all compulsory parts or compensated absence in accordance with the course director's instructions, the student's results will not be registered in LADOK. Absence from a compulsory activity may result in that the student cannot compensate the absence until the next time the course is given.

Limited number of examinations or practical training sessions

Students who have not passed the course after their first presentations are entitled to rework their report and/or presentation and participate in five more presentations. If the student has not passed the course after six presentations, no additional opportunity to present or new admission is provided.

Transitional provisions

After each course occasion there will be at least six occasions for the examination within a two-year period from the end of the course.

Other directives

The course language is English.

Course evaluation will be carried out in accordance with the guidelines established by the Board of Higher Education.

Oral evaluation in the form of course council meetings will be carried out during the course.

Literature and other teaching aids

Specific material referred to during the course forms the course literature.
