Course syllabus for

Degree Project in Biomedicine, 30 credits

Examensarbete i biomedicin, 30 hp

This course syllabus is valid from spring 2020.

Please note that the course syllabus is available in the following versions:

Autumn2012 , Spring2014 , Spring2015 , Spring2020

Course code	4BI090
Course name	Degree Project in Biomedicine
Credits	30 credits
Form of Education	Higher Education, study regulation 2007
Main field of study	Biomedicine
Level	AV - Second cycle
Grading scale	Pass with distinction, Pass, Fail
Department	Department of Biosciences and Nutrition
Decided by	Programnämnd 7
Decision date	2012-03-30
Revised by	Programme committee for study programmes in biomedicine
Last revision	2024-06-05
Course syllabus valid from	Spring 2020

Specific entry requirements

At least grade G for all courses in semesters 1 and 2 and registration for the course Research project, 16 credits, or an equivalent course within exchange studies.

Objectives

The course enables students to, under supervision and via independent work, plan and carry out a research project within the biomedical field.

On completion of the course, the student should be able to:

Regarding knowledge and understanding

- acquire and critically review relevant scientific literature in support of broadening and deepening his or her knowledge of the chosen project and its biomedical field,
- establish a plan for an experimental project and be able to explain the choice of methods to solve a stated scientific issue,
- collect data for compilation and statistical treatment.

Regarding skills and ability

- show a certain degree of independent, critical and creative thinking,
- apply experimental methods to solve a stated scientific issue,
- place and evaluate his or her own work in the specific research field of the project and in a broader scientific perspective,
- formulate new scientific issues arisen in connection with the implementation of the project,
- critically and objectively assess others' scientific work and be able to give relevant feedback,
- present his or her work in written and oral forms, for the scientific community,
- present his or her work in written form for laymen,
- reflect upon the ethical concerns of the project, as well as the project's impact on society.

Regarding judgement and approach

- show a professional approach regarding time planning, collegial cooperation and the relationship between theoretical and practical expertise,
- in a reliable way and with good order handle scientific material,
- carry out the project work according to Karolinska Institutet's guidelines for ethically correct research.

Content

Individual work with literature studies. An individual project plan will be written by the student and supervisor together. The project work can be performed at other universities or government agencies than Karolinska Institutet or at a company.

Teaching methods

Individual work under supervision but with a certain degree of independence, plus participation in seminars, journal clubs and other similar activities taking place where the work is carried out. Studies of scientific literature according to the recommendation of the supervisor and the student's own assessment.

Examination

Written summary of the work in the form of a scientific report, a press release aimed at a general (layman) audience and an oral presentation. The examiner sets the grade after consultation with the supervisor and the examining teacher, based on the student's work performance and presentation.

If submission of the report occurs later than the set deadline the student loses the opportunity to obtain the grade of pass with distinction for the course.

Limited number of examinations or practical training sessions

Students who have not passed the course after their first presentation (written or oral) are entitled to rework their report and/or presentation and participate in five more presentations. If the student has not passed the course after four presentations, he/she is recommended to retake the course the next time it is held, with a new project. In connection with that course the student will be granted two more opportunities to present. If the student has failed six presentations, no additional presentation opportunity or possibility to retake the course will be offered.

The course director assesses if, and in that case how, absence can be compensated. Before the student has participated in all compulsory parts or compensated absence in accordance with the course director's instructions, the student's results for respective part will not be registered.

If there are special grounds, or a need for adaptation for a student with a disability, the examiner may decide to deviate from the syllabus's regulations on the examination form, the number of examination opportunities, the possibility of supplementation or exemptions from the compulsory section/s of the

course etc. Content and learning outcomes as well as the level of expected skills, knowledge and abilities may not be changed, removed or reduced.

Transitional provisions

The course has been cancelled and was last offered in the spring semester of 2022. Examination according to this syllabus will be given for the last time in the spring semester of 2025 for students who have not completed the course with a passing grade.

Other directives

The course language is English.

Course evaluation will be carried out in accordance with the guidelines established by the Board of Higher Education.

Literature and other teaching aids

Individual reading list will be established in the project plan for the present degree project.
