Course syllabus for

Applied communication in biomedicine 1 including philosophy of science and bioethics, 8 credits

Tillämpad kommunikation i biomedicin 1 med vetenskapsteori och bioetik, 8 hp

This course has been cancelled, for further information see Transitional provisions in the last version of the syllabus.

Please note that the course syllabus is available in the following versions:

Autumn2012 , Autumn2014 , Autumn2016 , Autumn2018 , Autumn2019

Course code	4BI092
Course name	Applied communication in biomedicine 1 including philosophy of science and bioethics
Credits	8 credits
Form of Education	Higher Education, study regulation 2007
Main field of study	Biomedicine
Level	AV - Second cycle
Grading scale	Pass, Fail
Department	Department of Biosciences and Nutrition
Decided by	Programnämnd 7
Decision date	2012-03-30
Revised by	Programme committee for study programmes in biomedicine
Last revision	2018-02-21
Course syllabus valid from	Autumn 2018

Specific entry requirements

A Bachelor's degree or a professional degree worth at least 180 credits in biomedicine, biotechnology, cellular and molecular biology, medicine or equivalent exam. English language skills equivalent to English B (with at least the grade Pass) are required.

Objectives

Upon completion of the course, the student should:

Regarding knowledge and understanding

- be able to explain the central principles regarding scientific communication, philosophy of science

- and bioethics,
- know how to apply rhetorical tools, choose the most efficient arguments, and the vocabulary required to reach out to different audiences within and outside the research community,
- know how to use the structure and language style appropriate for a scientific article, especially the English used.

Regarding competence and skills

- be able to give a structured oral presentation and be able to handle a presentation computer programme,
- be able to summarise in writing, in the form of an abstract, scientific articles within the biomedical field,
- be able to produce a well-structured and well-designed poster,
- be able to analyse and present scientific theoretical issues or ethical problems, including global justice, related to the biomedical field.

Regarding judgement and approach

- be able to review and critically assess scientific presentations,
- show a professional, scientific and ethical attitude to presentations of experimental data and other acquired information.

Content

The course is centred around basic applied communication within the biomedical field. During the course, philosophy of science and bioethics are also covered.

Teaching methods

The teaching includes lectures, group tuition and project work on group- and individual level.

Examination

The course is examined through written and/or oral presentation of case studies related to biomedical ethics/philosophy of science, written task in scientific writing, exercises in oral presentation and oral presentation of group-produced poster. The grades for each assignment are Fail/ Pass. To obtain a grade of Pass for the course, the student must obtain the grade of Pass for all assignments.

Compulsory participation:

Group work on case examples in philosophy of science and biomedical ethics, scientific writing exercises and oral presentations. The course director assesses if, and in that case how, absence can be compensated. Before the student has participated in all compulsory parts or compensated absence in accordance with the course director's instructions, the student's results for the course will not be registered in LADOK.

Limited number of examinations or practical training sessions

Students who have not passed the regular examination are entitled to participate in five more examinations. If the student has failed six examinations/tests, no additional examination or new admission is provided.

The number of times that the student has participated in one and the same examination is regarded as an examination session. Submission of a blank examination is regarded as an examination. An examination for which the student registered but not participated in, will not be counted as an examination.

Transitional provisions

After each course occasion there will be at least six occasions for the examination within a 2-year period from the end of the course.

Other directives

The course language is English.

The course will be evaluated in accordance with the guidelines established by the Board of Higher Education.

Oral evaluation of the course, in the form of course council meetings will be carried out during the course.

Literature and other teaching aids

Specific material referred to during the course forms the course literature.
