## **Specific entry requirements**

Bachelor's degree or professional qualification worth at least 180 credits in public health science, healthcare or other relevant social sciences subject area. Proficiency in the English language documented by an internationally recognized test such as TOEFL with a total score of at least 79 (internet based), 550 (paper based), 213 (computer based), IELTS with a total score of at least 6,0 (no band less than 5,0), or other documentation that certifies English language skills equivalent to English B at Swedish upper secondary school.

## **Objectives**

The objective of the course is to provide an introduction to health outcomes research including methodological considerations and applications in different contexts.

After completion of the course, students should be able:

**Knowledge and understanding**

- to describe and compare different health outcomes measures
- to describe and compare different methods used to value health states

**Skills and abilities**

- to analyse health outcomes data
- to present health outcomes results
- to read and interpret scientific articles on health outcomes research

**Judgement and approach**

- to reflect on the choice of health outcomes measure in relation to certain aspects
- to reflect on the choice of different methods when valuing health states
- to reflect on different perspectives, preferences, when valuing health states
- to reflect on multidisciplinary in population health studies
- to reflect on inequalities in health when conducting health outcomes research
- to critically appraise and discuss scientific articles on health outcomes research

## **Content**

**Self-rated health****Generic health outcomes measures****Condition-specific outcomes measures****Health-related quality of life****Utility measures****Quality-adjusted life year****Methods for valuation of health states****Valuation perspective****Methods for data collection****Health outcomes data analyses****Presenting health outcomes results****Determinants for health****Demographic, psychological and social factors****Inequalities in health****Equity aspects****Ethical aspects****Population studies****Measurement in vulnerable groups****Applications in different contexts**

## **Teaching methods**

Lectures; seminars; group work; individual assignments

## **Examination**

- individual written assignment
- individual contribution in written report and oral presentation of group work

Requirements for the grade Pass with distinction (VG) are VG on the written assignment, and pass (G) on remaining assignments.

**Compulsory participation**

Participation in seminars, group work and certain lectures is compulsory. Detailed information will be given in the schedule. The course director assesses if, and in that case how, absence can be

compensated. Before the student has participated in all compulsory parts or compensated absence in accordance with the course director's instructions, the student's results for the course/respective part will not be registered in LADOK.

Limitation of number of occasions to write the exam

The student has the right to write the exam six times. If the student has not passed the exam after four participations he/she is encouraged to visit the study advisor.

The number of times that the student has participated in one and the same examination is regarded as an examination session. Submission of a blank examination is regarded as an examination. An examination for which the student registered but not participated in will not be counted as an examination.

## Transitional provisions

The course will be closed-down and is offered for the last time in spring semester 2017. For students who has not successfully passed the course, examination will be provided for the last time during the spring semester 2019.

## Other directives

Course evaluation will be carried out in accordance with the guidelines established by the Board of Education.

The course language is English.
