

Course syllabus for

Collecting and Organizing Epidemiological Data, 7.5 credits

Insamling och hantering av epidemiologiska data, 7.5 hp This course syllabus is valid from autumn 2019. Please note that the course syllabus is available in the following versions: Autumn2019, Autumn2022, Autumn2023, Autumn2024

Course code 4FH084

Course name Collecting and Organizing Epidemiological Data

Credits 7.5 credits

Form of Education Higher Education, study regulation 2007

Main field of study Public Health Sciences
Level AV - Second cycle

Grading scale Pass with distinction, Pass, Fail
Department Department of Global Public Health

Decided by Utbildningsnämnden PHS

Decision date 2018-10-09

Revised by Education committee PHS

Last revision 2019-03-06 Course syllabus valid from Autumn 2019

Specific entry requirements

A Bachelor's degree or a professional degree equivalent to a Swedish Bachelor's degree of at least 180 credits in public health science, healthcare or other relevant social sciences subject area. And proficiency in English equivalent to English B/English 6.

Objectives

The aim of the course is to provide both theoretical and practical skills on quantitative data collection methods as well as an orientation of how to handle collected data in a structured and ethical way.

On completion of the course, the student should be able to:

- Understand key theoretical concepts regarding survey methodology, data collection and questionnaire design
- Demonstrate knowledge about the ethical review process from a global perspective
- Comprehend and utilize the basic principles of sampling (i.e. sample size calculation and sample

Course code: 4FH084

selection methods) in cross-sectional surveys

- Explain and demonstrate elements needed for informed consent
- Design, plan and implement a questionnaire for a survey on a specific topic
- Collect and analyze data from an observational study

Content

The course gives theoretical and practical knowledge and skills around quantitative data collection methods, within the public health field. The course will cover the most important theoretical issues regarding survey methodology, data collection, questionnaire design, and sampling, including sampling selection, sample size calculation, response rates, ethical review process and informed consent. Time will also be devoted to work on group and individual assignments. The purpose of the individual assignment is to design and pre-test a questionnaire, and to build the corresponding database based on your research interest. The purpose of the group assignment is to get a practical experience of the process of survey design and data collection. Throughout the course students are required to reflect upon and consider the ethical aspects of quantitative data collection methods. Canvas will be used to provide instructions and feedback for the assignments, and to upload relevant materials.

Teaching methods

A combination of techniques will be used depending on the specific topics aiming to engage students in the teaching-learning process to promote reflective thinking and active collaborative education following a deep approach to learning. This includes the individual and group assignments, peer assessment, but also interactive and traditional lectures.,

Examination

The examination will consist of three components:

- a. Individual assignment graded as fail, pass, and pass with distinction.
- b. Group assignment and presentation graded as fail and pass
- c. Individual written final exam graded fail (<65%) pass (65-89%), and pass with distinction (90% or more)

To obtain the final grade *pass* on the course, the student must be awarded at least *pass* on all three examination components. To obtain the grade *pass with distinction* the student must be awarded *pass with distinction* on all individual components (a and c).

Compulsory participation

Participation in the individual and group work is compulsory. The course director assesses if and, in that case, how absence can be compensated. Before the student has participated in all compulsory parts or compensated absence in accordance with the course director's instructions, the student's results for the course/respective part will not be registered in LADOK.

Limitation of number of occasions to write the exam:

The student has the right to write the exam six times. If the student has not passed the exam after four participations he/she is encouraged to visit the study counselor.

The number of times that the student has participated in one and the same examination is regarded as an examination session. Submission of a blank examination is regarded as an examination. An examination for which the student registered but not participated in will not be counted as an examination.

If there are special grounds, or a need for adaptation for a student with a disability, the examiner may decide to deviate from the syllabus's regulations on the examination form, the number of examination opportunities, the possibility of supplementation or exemptions from the compulsory section/s of the course etc. Content and learning outcomes as well as the level of expected skills, knowledge and abilities may not be changed, removed or reduced.

Course code: 4FH084

Transitional provisions

Examination will be provided during a time of two years after a possible cancellation of the course. Examination can take place according to an earlier literature list during a time of one year after the date when a major renewal of the literature list has been made.

Other directives

Course evaluation will be carried out in accordance with the guidelines established by the Board of Education.

The course language is English.
