

Course syllabus for

Histopathology and Clinical Pathology, 5 credits

Histopatologi och klinisk patologi, 5 hp

This course syllabus is valid from autumn 2020.

Please note that the course syllabus is available in the following versions:

[Autumn2015](#) , [Autumn2016](#) , [Autumn2020](#) , [Autumn2023](#) , [Autumn2024](#)

| | |
|----------------------------|--|
| Course code | 4TX016 |
| Course name | Histopathology and Clinical Pathology |
| Credits | 5 credits |
| Form of Education | Higher Education, study regulation 2007 |
| Main field of study | Toxicology |
| Level | AV - Second cycle |
| Grading scale | Fail (U), pass (G) or pass with distinction (VG) |
| Department | Institute of Environmental Medicine |
| Decided by | Programnämnd 7 |
| Decision date | 2015-04-09 |
| Revised by | Education committee IMM |
| Last revision | 2020-03-06 |
| Course syllabus valid from | Autumn 2020 |

Specific entry requirements

At least the grade Pass for the course Principles of toxicology within the Master's Programme in Toxicology.

Objectives

Upon completion of the course, the student should be able to:

Regarding skills and ability

- identify and describe the normal appearance and structure of different tissues and organs,
- identify and describe pathological effects that may be caused by toxic substances,

Regarding judgement and approach

- differentiate between different pathological features and discuss possible toxicological modes of action involved in pathogenesis.

Content

Anatomy, histology, hematology and blood chemistry of relevance to toxicity testing. Structure and function of the liver and other toxicologically relevant organs. General and specific pathological changes that can be identified by clinical blood analyses and histological examination. Examples of toxicological effects by specific chemicals.

Teaching methods

Teaching will be in the form of lectures, seminars, written assignment, written feedback to other student and oral presentation.

Examination

The examination consists of written examination.

If there are special grounds, or a need for adaptation for a student with a disability, the examiner may decide to deviate from the syllabus's regulations on the examination form, the number of examination opportunities, the possibility of supplementation or exemptions from the compulsory section/s of the course etc. Content and learning outcomes as well as the level of expected skills, knowledge and abilities may not be changed, removed or reduced.

Compulsory participation

All seminars and presentations are compulsory. The examiner assesses if, and in that case how, absence can be compensated. Before the student has participated in all compulsory parts or compensated absence in accordance with the examiner's instructions, the student's results for respective part will not be registered. Absence from a compulsory activity may result in that the student cannot compensate the absence until the next time the course is given.

Transitional provisions

After each course, there will be at least 6 occasions for examination within a two-year period after the end of the course.

Other directives

The course language is English.

Course evaluation will be carried out in accordance with the guidelines established by the Board of Higher Education.
