- Legislation, rights - Bases for priority - Ethical aspects - Rights, fundamental values, policy, priority, ethics, - Patient cases/exercises - Welfares - Quality assurance and follow up - What implies teamwork? Advantages within the dementia care Within healthcare respectively nursing - Attitudes/treatment

### **Teaching methods**

The course is carried out as distance education and has a student-activating learning in focus as educational model. The distance education is IT-based and is characterised by an independent and collaborative learning. In the course occurs both individual study assignments, work in groups, virtual discussions, seminars and lectures.

#### **Examination**

The examination is both formative, i.e. evaluation during the course, and summational, i.e. evaluation of the contents of the course. The formative examination takes place through active participation in seminar presentations, both individual and in groups. To pass the assignments, it is required that the student has participated actively in the completion of the assignments and in both written and oral presentation/discussion of these. The summational examination takes place through a reflecting individual written report, based on advanced study in chosen fields of the course content, on relevant literature, and also a critical discussion of possible application. The reports should also be presented orally. The reports should be presented and discussed in a seminar together with teachers and fellow students.
