

Health clearance

Instructions for students

A health clearance is required of all students attending placement on a healthcare programme within Stockholm County Council, or services that have an agreement with Stockholm County Council. The purpose of the health clearance is to help prevent the spread of infectious diseases in healthcare work.

The attached form (health clearance) should be completed and signed by a licensed physician prior to your departure for Sweden. In some cases, further medical investigation will be necessary upon arrival, through Student Wellbeing Centre, KI.

If you need to visit Student Wellbeing Centre (according to the instructions below), please bring a signed and printed original copy of your health clearance with you.

You will also need to present a printed original copy of your health clearance at your clinic of placement. Please note that should you fail to provide a valid health clearance upon request, you may be denied clinical placement.

Upon arrival to Sweden

You need to visit Student Wellbeing Centre for further medical screening if you meet any of the following criteria:

- you have had contact with medical care facilities outside the Nordic region, either as a patient or as student/staff in direct patient care, within the past 6 months.
- you have been in contact with an MRSA carrier, for example a member of your household/family.
- you have undergone TB screening with TB-test and/or X-ray (bring copy of test result).
- prior treatment for TB or prior LTBI- (latent tuberculosis)-diagnosis.

For contact information and drop-in hours please visit our website:

<https://education.ki.se/welcome-to-student-wellbeing-centre>

If you do not meet any of the four criteria listed above, you may proceed directly to your clinic of placement, and you do not need to visit Student Wellbeing Centre.
