

Guidelines for the Utilization of AI tools (e.g., ChatGPT) in the Joint Master's Programme in Health Informatics at KI

These guidelines are established to oversee the usage of software like ChatGPT or similar AI tools by students enrolled in the Joint Master's Programme in Health Informatics at Karolinska Institutet (KI).

When students employ AI tools, they commit to adhering to these guidelines:

- 1. Authorized Utilization:** The Joint Master's Programme in Health Informatics at KI authorizes students to use AI tools to enhance their comprehension of scientific knowledge. Students are allowed to employ AI tools to support their learning and improve communication and writing skills. However, it is mandatory for students to be transparent and describe in detail how they used AI tools for preparing their assignments, exams, or theses and to offer a rationale for their choice.
- 2. Ownership of Originality:** Students bear full responsibility for the originality and content of all texts and documents they submit as part of the Joint Master's Programme in Health Informatics. It is strictly forbidden for students to claim ownership of AI tools-generated texts, models, or code. Reference to the used AI tools must be made.
- 3. Consequences for Academic Misconduct:** In instances where there is suspicion that a student has contravened the guidelines concerning academic misconduct by utilizing AI tools to create assignments, exams, theses, etc., appropriate measures will be taken in accordance with established procedures for addressing academic misconduct.
- 4. Modifications to the Guidelines:** These guidelines are subject to potential amendments at any time. Students will be notified of any proposed changes to the guidelines.
