

Course information

# Immune-mediated glomerular disease

---

This 5-day course covers the major topics in immune-mediated glomerular disease presenting recent evidence-based clinical practice to the attendees.

## Purpose and goal

The course provides a comprehensive up-to-date view of clinical management of patients with glomerulonephritis and related conditions.

The aim is to provide an overall picture of the topic and provide the participants with evidence-based knowledge of clinical management of patients with immune-mediated glomerular disease.

The course provides participants exciting opportunities to exchange ideas and listen to leading Swedish experts in the field.

## Target group

Licensed doctors undergoing specialist training in renal medicine (nephrology). Some experience in managing kidney patients with glomerular disease is desirable.

The course can be adapted to post-graduate level if required.

## Course outline

The course content will be discussed in lectures (22 hours), pathology/microscopy session (2 hours) and case discussions (8 hours).

The web-based teaching section consists of lecture material, articles and presentations. The course ends with examination and course evaluation (2 hours).

## Course content

- Clinical syndromes in inflammatory renal diseases.
- Diagnostics, treatment and monitoring of immune-mediated glomerular diseases.
- Immunological mechanisms and the complement system's role in inflammatory kidney diseases.
- Rare glomerular diseases are briefly discussed as well as hereditary nephritis, pediatric aspects and recurrent and de novo nephritis after renal transplantation.

## Participating teachers

Associate Professor Peter Bárány (nephrologist)

Associate Professor Annette Bruchfeld (nephrologist)
