Comment

Due to the circumstances that we had our course in the middle of the Covid-19 pandemic it worked well. The team around the arrangement of our course did an excellent job to complete the course despite everything.

How would you grade the online part of the education (Canvas and Zoom-lecture)

How would you grade the online part of the education (Canvas and Zoom-lecture)	4,0	0,0	0,0 %	4,0	4,0	4,0	4,0	4,0

Comment

Canvas could be more logistic.

Sometimes I had trouble login on to Zoom and if we were split into "Breakout Rooms" I sometimes had trouble joining my assigned group. Not always though...

Will you be able to make use of your new skills in your workplace?

Give examples of particularly rewarding elements/activities during the course.

Give examples of particularly rewarding elements/activities during the course.

HR/management, stress in field, project-planning, concepts in field if humanitarian work in disasters.

Most lectures and lecturers were excellent. Very relevant. I liked the way that we had a assigned country and worked with that country from different angles throughout the course.

Give examples of elements/activities that were not particularly rewarding

Assume that you were the course leader. What would you like to change/develop?

Assume that you were the course leader. What would you like to change/develop?

Written assignments were difficult to start with. Perhaps lectures on basic knowledge and vocabulary and concepts, How to calculate etc during first week (online or irl), then home studies to finish assignments 2 weeks, then back online/irl for lectures.

I would put some of the first week lectures online, before/during the work of our first three assignments. Many of the lectures could be held online which would even out the possibility for more people that does not live in Stockholm to join the course - it's expensive to live in Stockholm if you don't have friends or family to stay with. 3-4 weeks on site is probably necessary though to complete clinical days and to meet your future colleges. And it's nice to meet too.

What would you like to say to the participants in the upcoming course?

What would you like to say to the participants in the upcoming course?

Take time off to focus entirely on the course.

Join! You'll learn heaps! But it's not a stroll in the park - avoid other commitments during the course weeks.

Would you be interested in attending more courses within this area, or other areas? If so, what?

Would you be interested in attending more courses within this area, or other areas? If so, what?

Yes. Maternity health.

Master in global health!!

Yes. Not sure, maybe a follow up, overall course...
