

Health Care Executive Management Course

# How do we improve health care value?

A major challenge facing any leader in health care today is how to balance the sometimes opposing views that staff, politicians, and patients have about the aim of health care - is it to improve patient experience, population health, or to reduce costs? Join us for a course where we will use research and evidence to develop insights into medical management the same way we demand that our doctors and nurses make use of the best available evidence.

## Purpose

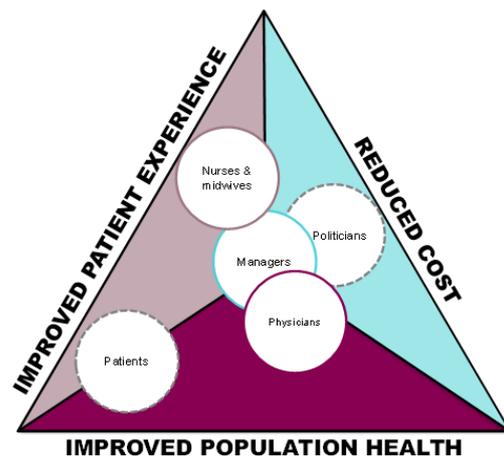

Based on the latest research and evidence in medical management coupled with participants' experiences, we will help each other develop greater insight into the challenges facing health care organizations, and how the evidence can help us develop medically and fiscally responsible approaches better able to address these challenges.

## Target group

Senior leaders, middle management, and first line management.

## Date and venue

To be decided.

*The view of the aim of health care we hold is largely a product of our role in the system. Modified from Storkholm et al., 2016.*

## Health Care Executive Management Course

### How do we improve health care value?

---

#### Course management/Professors

John Øvretveit, Professor of Health Innovation, Implementation and Evaluation.

Mats Brommels, Professor of Medical Leadership, Organization and Innovation

Carl Savage, PhD, researcher in Clinical Management

Pamela Mazzocato, PhD, Researcher in Clinical Management

#### Approach

After the course, you will be better able to:

- Understand the assumptions (mental models) that guide your current approach to medical management
- Make decisions informed by the research in medical management
- Support the development of high quality care at a lower cost
- Conceptualize your organization in order to diagnose and treat the symptoms and cause of organizational misalignment

#### Fee

Please contact us for more information.

#### Entry requirements

In order to meet the entry requirements, applicants must have at least three years of management experience. The language of instruction is English, and applicants are recommended to have a good proficiency in English.

Please visit [ki.se/epe](http://ki.se/epe) for more information about application and documentation requirements.
